

## Containers

`docker ps` : listing containers

`-a` : list all, running and stopped

`docker run <image>` : run an image

`-i` : interactive mode

`-t` : expose TTY

`-p` : expose port `ext:int` eg. `3000:80`

`-d` : detached mode

`docker rm <container>` : remove container

`docker stop <container>` : stop running container

`docker start <container>` : start stopped container

`docker attach <container>` : attach to the running container

`docker logs <container>` : fetch the logs of the container

`-f` : follow

## Images

`docker images` : list all images
